

Airline Delay Analysis

Scenario

An airline company faces frequent flight delays.

Dataset Contains

- Flight Number
- Departure Time
- Arrival Time
- Delay Minutes
- Weather Condition
- Airport

Problem Statement

Identify causes of flight delays.

Tasks

- Handle missing flight timings
- Analyze airport performance
- Detect weather-related issues

Expected Visualizations

- Delay trends
- Airport comparison charts
- Weather impact dashboard

Challenge

Find:

- Which airports delay most?
- Which weather condition impacts flights?
- What time has highest delays?

Storytelling Requirement

Present delay reduction recommendations.
