

Power BI Coding Challenge – Finance Domain

Problem Statement

You are a **Financial Data Analyst** at a company.

Your task:

Analyze company financial performance and identify **profit drivers, loss areas, and growth opportunities**

Dataset

Table: Financial_Data

Date	Region	Product	Revenue	Cost	Profit	Discount	Customer_Type
01-01-2024	South	Loan	50000	30000	20000	5%	New
02-01-2024	North	Credit Card	30000	20000	10000	10%	Existing
03-01-2024	East	Insurance	40000	25000	15000	0%	New
04-01-2024	West	Loan	60000	35000	25000	15%	Existing
05-01-2024	South	Insurance	45000	30000	15000	5%	New

(You can expand to 100+ rows for practice)

Tasks

◆ Task 1: Create Calculated Columns (DAX)

1. Profit Margin

Profit Margin = Financial_Data[Profit] / Financial_Data[Revenue]

2. Discount Value

Discount Value = Financial_Data[Revenue] * Financial_Data[Discount]

◆ Task 2: Create Measures (Important)

1. Total Revenue

Total Revenue = SUM(Financial_Data[Revenue])

2. Total Profit

Total Profit = SUM(Financial_Data[Profit])

3. Profit Margin %

Profit Margin % = DIVIDE([Total Profit], [Total Revenue])

◆ **Task 3: Business Questions (Core)**

1. Which **region** generates highest profit?
2. Which **product** has highest revenue but low profit?
3. Does **discount** impact profit negatively?
4. Which **customer type** is more profitable?
5. Monthly **revenue** trend

Task 4: Dashboard Requirements

Must include:

- KPI Cards:
 - Total Revenue
 - Total Profit
 - Profit Margin %
- Charts:
 - Bar → Profit by Region
 - Column → Revenue by Product
 - Line → Revenue Trend (Date)
 - Pie → Customer Type Distribution
- Slicers:
 - Region

- Product
- Customer Type

Task 5: Advanced

Create **Top Performing Product**

Top Product =

TOPN(1, VALUES(Financial_Data[Product]), [Total Revenue], DESC)

2. Create Loss Flag

Loss Flag = IF(Financial_Data[Profit] < 0, "Loss", "Profit")

3. Dynamic Title

Title = "Financial Dashboard - " & SELECTEDVALUE(Financial_Data[Region])
